We propose a dependable supply of specialty roasted and green coffee beans for Northstar Cafe Group. Our team can supply 12,000 kilograms each month across 40 cafes. We understand that consistent flavor, dependable delivery, traceable farms, and clear pricing matter to your customers.

PRODUCT QUALITY AND SOLUTION

Our quality team tests each lot for moisture, defects, and cup profile. We provide harvest year, origin, farm cooperative, and lot number for each shipment. Three sample lots scored 84 to 86 in our internal tasting. We offer washed Colombia, natural Ethiopia, and a house espresso blend. A certified lab tests pesticide residues twice per year. We will send roast samples before each quarterly menu change.

DELIVERY AND IMPLEMENTATION

A dedicated account lead and two quality specialists will set up the program. Week 1 confirms volumes and recipes; week 2 completes sample tasting; week 3 approves labels and ordering; week 4 starts the first delivery. We keep eight weeks of green bean safety stock and have two approved freight partners. We can deliver to all locations every Tuesday and Thursday. If a harvest is delayed, we will offer a pre-approved substitute lot and notify the buyer within one business day.

COMMERCIAL OFFER

Annual estimate: $408,000 for 144,000 kilograms, or $2.83 per kilogram average before freight. Freight is estimated at $18,000 annually and invoiced at cost. Price is fixed for six months, then reviewed against published origin market changes with 60 days notice. Payment terms are net 30. Setup and sample kits are included. Premium quality and redundant inventory make our offer higher priced than spot-market options.

FOOD SAFETY, EXPERIENCE AND SUPPORT

Our roastery follows a documented food safety plan and is SQF certified. We maintain lot-level traceability from cooperative to delivery and retain test records for five years. Our recall procedure identifies affected lots within two hours.

We have supplied regional grocers and cafes for 11 years. Three references are available upon request. A named account manager responds within four business hours; urgent quality issues have a two-hour response target. Weekly shipment status and monthly quality summaries are included. We can share insurance certificates and the most recent audit summary under a standard supplier review.
