BrightPath offers an affordable coffee bean program for Northstar Cafe Group. We can provide 12,000 kilograms each month and start quickly. Our proposal focuses on low cost and flexible ordering. We can supply a medium roast espresso and two rotating origins.

PRODUCT AND DELIVERY

We source beans through several importers and select lots based on availability and price. We check incoming bags for visible damage and roast a sample before production. We do not currently provide a formal cupping score for each lot. Our team has 18 months of wholesale coffee experience and currently supplies a small group of independent cafes.

We can begin deliveries in two weeks. Customers place orders through email by Friday for the following Tuesday. We have a small warehouse and normally hold about one week of stock. If a shipment is delayed, our sales lead will suggest another available coffee. We have not yet documented a formal backup carrier or substitute approval process.

COMMERCIAL OFFER

Annual estimate: $331,200 for 144,000 kilograms, or $2.30 per kilogram. Local delivery is included for the first 20 cafe addresses. A fuel surcharge may apply for new locations. Pricing is reviewed monthly based on importer costs. Payment terms are net 15. Sample bags are free, while custom packaging is quoted separately. The quick onboarding plan is a single kickoff call followed by the first shipment.

FOOD SAFETY AND TRACEABILITY

We keep supplier invoices and warehouse receiving records. Bags have origin labels when provided by the importer. We are developing a lot tracking spreadsheet. We do not currently hold SQF certification or provide third-party residue testing. Our roasting room follows cleaning checklists and staff food-handling training. A written recall timeline and record-retention period are not included in this proposal.

SUPPORT AND EXPERIENCE

Our owner handles customer questions during business hours and usually replies the same day. We can share two small-cafe references with permission. We do not have a dedicated account team or a formal service-level agreement.

Our strengths are low price, a short start-up window, and a straightforward order process. Buyers should consider our limited wholesale history, short inventory buffer, evolving traceability records, and limited food safety documentation when reviewing this offer. We are willing to work with Northstar to document additional controls during onboarding.
