NexaWorks proposes a balanced bean program built around predictable onboarding and responsive service. We can supply 12,000 kilograms per month to Northstar Cafe Group from a portfolio of cooperatives in Colombia, Brazil, and Ethiopia. We will agree a house blend and two seasonal offerings with your coffee team.

QUALITY AND IMPLEMENTATION PLAN

Each production lot receives a roast and cup review against an agreed flavor profile. We record origin, cooperative, harvest, import lot, roast date, and batch number. A third-party lab tests a rotating sample for relevant residues each quarter. Our quality lead shares results and corrective actions. We target a score of at least 82 on our internal tasting scale and notify you if a lot falls short.

The six-week onboarding has clear owners: week 1 discovery and volume forecast; week 2 sample tasting; week 3 blend approval; week 4 ordering and label setup; week 5 pilot delivery to five cafes; week 6 rollout. A project manager runs weekly check-ins and tracks decisions and risks.

RELIABILITY AND COMMERCIAL OFFER

We hold six weeks of finished or green inventory across two warehouses and use two freight providers. We provide weekly order status and can reroute deliveries within 24 hours. A continuity plan names the account owner and backup owner. Substitute beans require written buyer approval before dispatch.

Annual estimate: $374,400 for 144,000 kilograms, or $2.60 per kilogram. Regional freight and standard packaging are included. Custom printed bags have a one-time $2,400 setup fee. Prices remain fixed for 12 months; renewal changes are discussed 90 days in advance. Payment terms are net 30.

FOOD SAFETY AND SUPPORT

Our roasting facility maintains a written food safety plan, annual third-party audit, allergen controls, and lot-level traceability. We retain records for seven years. Mock recalls are practiced twice yearly; our last exercise traced a lot in 90 minutes. We provide certificates and audit summaries during supplier onboarding.

EXPERIENCE AND SERVICE

We have eight years of wholesale experience with restaurants, campus cafes, and regional grocers. Three references are available. A named account manager responds within four business hours; urgent quality concerns are acknowledged within one hour and have a documented investigation process. Monthly service reviews cover on-time delivery, defects, and customer feedback.

Our offer aims to balance cost, quality, continuity, and practical implementation. We will agree scorecard measures with Northstar before the pilot and share a short progress report after the first 30 days.
